

Soilfloc® 30EVT

Effervescent Water Treatment Tablets

Product Description:

Soilfloc® 30EVT is an effervescent water-soluble, linear polyacrylamide (PAM) that is designed to improve water quality by flocculating and settling suspended clay particles in run-off water.

Soilfloc® 30EVT tablets allow you to make a PAM solution that is easy to apply in a variety of water quality situations without the use of PAM dilution equipment.

Soilfloc® 30EVT has also proven very effective as a temporary dust control additive to water trucks. This easy to use additive can reduce water truck trips up to 70%.

Application Rates:

275 gallons of water	1 tablet makes a 5ppm solution
----------------------	--------------------------------

** rates may vary based on conditions in the furrow, culvert, slope and water volume

Physical / Chemical Properties:

Appearance	White Tablet
Ionic Character	Anionic
Molecular Weight	Very High
Approx. Tablet Weight (g)	50
Tablet diameter (mm)	45
pH after dissolution	5-8
Storage temperature (°C)	5-30
Shelf life (months)*	12

* When stored inside a building at a stable temperature between 5° and 30°
